

Return Policy

Bravo Backtest ICT Indicator

Last Updated: 12 June 2026

This Return Policy explains how returns, refunds, cancellations, and access-related issues are handled for purchases of the Bravo Backtest ICT Indicator.

1. Digital Product Notice

The Bravo Backtest ICT Indicator is a digital TradingView indicator. Once access has been granted, the product cannot be physically returned.

Because this is a digital product with access delivered through TradingView, all sales are generally final unless this policy, our Whop page, applicable law, or our sole discretion states otherwise.

2. General Refund Position

Refunds are not automatically guaranteed after purchase.

By purchasing the Bravo Backtest ICT Indicator, you acknowledge that you are buying access to a digital indicator and that trading results are not guaranteed.

We do not provide refunds because a user changes their mind, does not use the indicator, experiences trading losses, expected guaranteed profits, or failed to cancel before a renewal date.

3. Situations Where a Refund May Be Considered

A refund may be considered at our discretion in situations such as:

- You were charged more than once for the same subscription period.
- You were charged incorrectly due to a technical or billing error.
- Access was not delivered due to an issue caused by Bravo Backtest.
- Another situation is approved by Bravo Backtest at our discretion.

Being eligible for review does not guarantee that a refund will be approved.

4. Situations Where Refunds Are Not Guaranteed

Refunds are not guaranteed for reasons including but not limited to:

- You changed your mind after purchasing.
- You did not use the indicator after receiving access.
- You did not understand how to use TradingView.
- You provided the wrong TradingView username.
- You failed to cancel your subscription before renewal.
- You experienced trading losses.
- You expected the indicator to guarantee profits, funded account passes, or trading success.
- You purchased using an affiliate code or discount code and later decided you no longer wanted access.

5. TradingView Username Responsibility

Access to the Bravo Backtest ICT Indicator is provided through your TradingView username.

You are responsible for providing your TradingView username correctly and exactly as it appears on TradingView.

If access is delayed because the wrong TradingView username was submitted, this does not automatically qualify for a refund. We will make reasonable efforts to correct the access once the correct username is provided.

6. Subscription Cancellations

Subscriptions must be cancelled through the platform where the purchase was made, such as Whop.

Cancelling a subscription prevents future billing but does not automatically refund the current billing period.

You are responsible for cancelling before your next renewal date if you do not want to be charged again.

7. How to Request a Refund Review

To request a refund review, contact us through one of the official channels below and include enough information for us to locate your order:

- Instagram: @bravobacktest
- Whop: @bravobacktest
- Email: contact@bravobacktest.com

Please include your full name, purchase email, Whop username if applicable, TradingView username, order date, and the reason for your request.

8. Processing Time

Refund review times may vary depending on the platform, payment provider, and the information provided with the request.

If a refund is approved, the funds will usually be returned through the original payment method used at checkout. The exact timing may depend on Whop, your bank, card provider, or payment processor.

9. Chargebacks and Payment Disputes

If you open a chargeback, payment dispute, or fraudulent claim, your access to the Bravo Backtest ICT Indicator may be suspended or removed while the dispute is being reviewed.

Fraudulent chargebacks or abusive payment disputes may result in permanent removal of access and may prevent future purchases from Bravo Backtest.

10. No Financial Advice or Trading Outcome Refunds

The Bravo Backtest ICT Indicator is provided for educational and informational purposes only and is not financial advice.

Trading involves risk. Refunds will not be issued because of trading losses, missed trades, failed funded account challenges, or because the indicator did not produce a specific trading outcome.

11. Policy Changes

Bravo Backtest may update this Return Policy at any time.

The latest version will apply once posted on our website, Whop page, or another official Bravo Backtest platform.

Nothing in this Return Policy limits any legal consumer rights that may apply in your country.

12. Contact

For return, refund, cancellation, or access questions, contact us through:

- Instagram: @bravobacktest
- Whop: @bravobacktest
- Email: contact@bravobacktest.com

Short Checkout Policy Text

The Bravo Backtest ICT Indicator is a digital TradingView indicator. Due to the digital nature of the product, all sales are generally final once access has been granted, unless required by law or approved by Bravo Backtest at our discretion. Refunds are not guaranteed for trading losses, unused access, change of mind, incorrect TradingView usernames, failure to cancel before renewal, or expectations of guaranteed profits. For refund review requests, contact Instagram @bravobacktest, Whop @bravobacktest, or contact@bravobacktest.com.
