

Terms of Service

Bravo Concepts ICT Indicator

Last Updated: 28 July 2026

These Terms of Service govern your purchase, subscription, access, and use of the Bravo Concepts ICT Indicator, provided by Bravo Concepts. By purchasing, subscribing to, accessing, or using the Bravo Concepts ICT Indicator, you agree to these Terms.

1. Product Description

The Bravo Concepts ICT Indicator is a TradingView-based indicator designed to display ICT-style chart visuals, including but not limited to SMTs, FVGs, iFVGs, CISDs, Equal Highs/Lows, Liquidity Sweeps, Sessions, Previous Day High/Low levels, dashboards, and other market structure-related visuals.

The indicator may display visuals and information from multiple timeframes on the same chart and is designed to assist users in identifying potential confluences.

The Bravo Concepts ICT Indicator is provided as a technical analysis tool only. It does not place trades, manage trades, guarantee trade outcomes, or provide personalised financial advice.

2. No Financial Advice

The Bravo Concepts ICT Indicator is provided for educational and informational purposes only.

Nothing provided by Bravo Concepts, the Bravo Concepts ICT Indicator, our website, our social media pages, our Whop page, or our support messages should be considered financial advice, investment advice, trading advice, or a recommendation to buy or sell any financial instrument.

Trading involves risk. You are fully responsible for your own trading decisions, risk management, account management, and results.

We do not guarantee profits, funded account passes, trading success, or any specific financial outcome.

3. Trading Risk Disclaimer

You understand and agree that trading forex, futures, commodities, indices, crypto, stocks, CFDs, or any other financial markets involves significant risk.

Past performance, backtests, examples, screenshots, testimonials, or marketing material do not guarantee future results. You should not trade with money you cannot afford to lose.

4. Access to the Indicator

Access to the Bravo Concepts ICT Indicator is provided through TradingView as an invite-only script.

To receive access, you must provide your correct TradingView username exactly as it appears on TradingView. If you provide the wrong TradingView username, access may be delayed. You are responsible for making sure your TradingView username is correct.

Access may be granted manually or through the connected access system used by Bravo Concepts. Delays may occur due to incorrect information, platform issues, payment issues, or other technical problems.

Access is linked to your active subscription and may be suspended or removed when your subscription expires, is cancelled, is refunded, is charged back, or has an unresolved failed payment.

5. Subscription Plans, Billing, and Automatic Renewal

The Bravo Concepts ICT Indicator is offered through monthly and yearly subscription plans, unless a different plan is clearly shown at checkout. Purchases and recurring payments may be processed through Whop or another approved payment platform.

The price, billing period, applicable taxes, trial details, and any discount will be shown at checkout. A yearly subscription is charged for the full yearly period in advance, while a monthly subscription is charged once each monthly billing period.

By starting a subscription, you authorise Whop or the relevant payment processor to store your selected payment method and charge it automatically at the start of each new billing period until you cancel the subscription or it is otherwise terminated.

Your subscription will automatically renew for additional periods of the same length unless you cancel before the next renewal date. You are responsible for reviewing your renewal date and cancelling in time if you do not want another charge.

Where a promotional or affiliate discount is applied as a recurring percentage discount at checkout, the same discount percentage will continue to apply to future renewals while that subscription remains continuously active, unless the checkout or promotion terms clearly state otherwise.

Failed or declined payments may be retried by the payment platform. Continued payment failure may result in suspension or removal of access, cancellation of the subscription, and responsibility for any unpaid amounts, subject to applicable law and platform rules.

6. Cancellation and Access After Cancellation

You may cancel your subscription through your Whop account or another cancellation method made available by Bravo Concepts or the payment platform. Cancellation turns off future automatic renewals; it does not normally reverse a charge that has already been processed.

You must cancel before your renewal date to avoid being charged for the next billing period. Unless otherwise stated or required by law, cancelling after a renewal charge does not automatically entitle you to a refund.

After cancellation, you will normally keep access until the end of the billing period that has already been paid for. Access may then be removed automatically or manually. No further recurring charges should be made after a valid cancellation takes effect.

Deleting TradingView, Whop, email, or social media accounts, not using the indicator, or asking us a general support question does not by itself cancel your subscription. You must use the recognised cancellation process.

7. Free Trials and Promotions

If a free trial is offered, the trial length, subscription plan, and amount charged after the trial will be shown at checkout. Unless stated otherwise, a free trial automatically converts into the selected paid subscription when the trial ends.

You must cancel before the trial expires to avoid the first subscription charge. Free trials may be limited to one per person, household, TradingView account, Whop account, or payment method, and may be refused or ended where abuse or fraud is suspected.

Promotional offers, affiliate discounts, trial periods, and eligibility requirements may change or end at any time for new purchases. The terms shown at checkout apply to the offer you accept.

8. Refund Policy

Because the Bravo Concepts ICT Indicator is a digital subscription service with access granted after purchase, subscription charges are generally final unless stated otherwise on our Whop page, required by law, required by the payment platform, or approved by us at our discretion.

Refunds may be considered in cases such as:

- Duplicate payments for the same billing period.
- You were charged incorrectly due to a confirmed billing or technical error.
- Access was not delivered due to an issue caused by Bravo Concepts.
- Another situation we decide is valid at our discretion.

Refunds are not guaranteed for reasons such as:

- You changed your mind or no longer want the subscription.
- You did not use the indicator or forgot to cancel before renewal.
- You cancelled after a monthly or yearly renewal charge was processed.
- You expected guaranteed profits, funded account passes, or trading success.
- You did not understand how to use TradingView or provided the wrong TradingView username.
- You experienced trading losses.
- The indicator was reasonably updated, modified, redesigned, or improved in accordance with these Terms.

Nothing in this policy limits any legal consumer rights that may apply in your country.

9. TradingView Account Requirement

You need a TradingView account to use the Bravo Concepts ICT Indicator.

We are not responsible for TradingView account issues, TradingView plan issues, platform downtime, charting limitations, script limitations, invite-only access display issues, or any changes TradingView makes to its platform.

If TradingView changes its rules, systems, Pine Script limitations, data, compatibility, or access controls, the Bravo Concepts ICT Indicator may be affected.

10. Acceptable Use

You agree not to:

- Share, resell, rent, sublicense, or redistribute access to the Bravo Concepts ICT Indicator.
- Copy, reverse engineer, decompile, reproduce, or attempt to extract the indicator's code or protected logic.
- Share private access with another person or use one subscription for multiple unrelated users.
- Claim ownership of the Bravo Concepts ICT Indicator.
- Use the Bravo Concepts ICT Indicator for any illegal or abusive purpose.
- Attempt to bypass our access controls, subscription requirements, or payment systems.
- Publicly leak private settings, protected logic, or restricted materials.

Violation of these rules may result in immediate suspension or removal of access without refund.

11. Intellectual Property

The Bravo Concepts ICT Indicator, including its code, visuals, branding, settings, structure, design, names, descriptions, calculations, logic, and related materials, belongs to Bravo Concepts unless otherwise stated.

An active subscription gives you a limited, revocable, non-transferable, non-exclusive right to use the indicator for your own personal trading or analysis during the paid subscription period.

You do not receive ownership of the indicator, its code, its logic, or any related intellectual property.

12. Updates, Modifications, and Future Changes to the Indicator

Bravo Concepts may update, improve, edit, redesign, modify, add, remove, replace, rename, limit, or discontinue parts of the Bravo Concepts ICT Indicator at any time.

Changes may affect features, settings, calculations, logic, visuals, labels, dashboards, default options, compatibility, performance, or how the indicator behaves. Updates may be made to improve the product, fix errors, respond to user feedback, adapt to TradingView or Pine Script changes, protect the product, or comply with legal or platform requirements.

We do not guarantee that every feature, setting, layout, visual, or behaviour available when you first subscribed will remain unchanged throughout your subscription. Reasonable product updates or feature changes do not automatically entitle you to a refund, subject to applicable law.

We may also release new features, remove outdated features, or change how existing features are organised or displayed. Access to future updates is included while your subscription remains active, unless a separate add-on or separate product is clearly offered and accepted by you.

13. Accuracy and Availability

We aim to keep the Bravo Concepts ICT Indicator working properly, but we do not guarantee that it will always be error-free, uninterrupted, accurate, compatible, or available.

Charting indicators can be affected by TradingView data, broker feeds, timeframe behaviour, market closures, Pine Script limitations, internet connectivity, platform changes, and other technical factors.

You are responsible for verifying information before making trading decisions.

14. Support

Support may be provided through Instagram DM, Whop, email, Discord, or another channel selected by Bravo Concepts.

Support is provided for subscription access, setup help, billing guidance, and general usage questions.

Support does not include personal trading advice, trade signals, account management, financial advice, or guaranteed strategy guidance.

15. Affiliate Codes and Promotions

We may work with affiliates, influencers, or partners who promote the Bravo Concepts ICT Indicator using discount codes or referral links.

Discounts, commissions, free trials, and promotional offers may change at any time for new subscriptions. Using an affiliate code does not change the risk disclaimer, refund policy, cancellation requirements, or your responsibility for your own trading decisions.

16. Suspension and Termination of Access

We may suspend or remove your access without refund if:

- You violate these Terms.
- You attempt to share, resell, copy, or leak the indicator.
- You abuse support, engage in fraud, or act dishonestly.
- Your subscription expires, is cancelled, is refunded, or remains unpaid.
- Your payment fails, is disputed, or is subject to a fraudulent chargeback.
- We are required to do so by TradingView, Whop, law, a payment processor, or another platform.

We may discontinue the indicator or a subscription plan in the future. Where an active prepaid period is materially affected, any remedy will be handled in accordance with applicable law, the payment platform rules, and the circumstances of the discontinuation.

17. Limitation of Liability

To the maximum extent allowed by law, Bravo Concepts will not be liable for trading losses, lost profits, account failures, funded account failures, missed opportunities, technical issues, platform issues, data issues, subscription interruptions, or any indirect or consequential damages.

Your use of the Bravo Concepts ICT Indicator is at your own risk.

18. User Responsibility

By using the Bravo Concepts ICT Indicator, you agree that:

- You are responsible for your own trading decisions.
- You understand trading involves risk.
- You will not rely on the indicator as your only reason to enter or exit trades.
- You will test and understand the tool before using it live.
- You will use proper risk management.
- You are responsible for managing and cancelling your subscription before renewal if you no longer want access.

19. Changes to These Terms

We may update these Terms at any time. The latest version will apply once posted on our website, Whop page, or another official Bravo Concepts platform.

Where required by law or reasonably appropriate, we may provide notice of material changes. Continued use of the Bravo Concepts ICT Indicator after changes take effect means you accept the updated Terms.

20. Contact

Checkout Agreement Text

By subscribing to the Bravo Concepts ICT Indicator, you agree that you are purchasing a monthly or yearly digital TradingView indicator subscription provided for educational and informational purposes only. It is not financial advice and does not guarantee profits, funded account passes, or trading success. Your subscription automatically renews at the end of each billing period and your payment method will be charged until you cancel. You must cancel before your renewal date to avoid the next charge. After cancellation, access normally remains available until the end of the paid billing period. Subscription charges are generally final due to the digital nature of the service, unless required by law or approved at our discretion. Access is provided through the TradingView username you enter and is available only while your subscription remains active. Bravo Concepts may update, edit, add, remove, replace, or change indicator features, settings, visuals, logic, and behaviour in the future. Sharing, reselling, copying, leaking, or attempting to reverse engineer the indicator is strictly prohibited and may result in access being removed without refund.
