

VIZORDESK - FINANCIAL & RISK DISCLAIMER

VizorDesk is highly committed to transparency regarding the nature of our digital intelligence software and cloud infrastructure. This document outlines the financial risks and operational responsibilities associated with using our autonomous systems.

1. Autonomous Intelligence Nature

VizorDesk operates exclusively as an autonomous quantitative data intelligence and analytics infrastructure. We are not a registered broker, financial advisor, or investment institution. The data, metrics (including but not limited to Dealer Gamma, CVD, and Z-Scores), and analytical models provided by the VizorDesk Terminal are for informational and educational purposes only. They do not constitute financial advice, trading signals, or a solicitation to buy or sell any financial asset, cryptocurrency, or derivative instrument.

2. Operator Assumption of Risk

Market operations involve severe risk of capital loss. The human operator is solely responsible for interpreting the raw data, managing their risk profile, and executing trades. VizorDesk does not guarantee the accuracy, completeness, or timeliness of the data feed, as market conditions and external API endpoints are subject to extreme volatility and latency.

3. Limitation of Liability (Hold Harmless)

By accessing the VizorDesk node and utilizing the terminal, the operator expressly acknowledges and agrees that VizorDesk, its founders, its developers, and its infrastructure providers shall bear absolutely zero liability for any financial losses, liquidated positions, missed opportunities, or damages resulting from the use or inability to use this terminal. Prior to accessing the terminal interface, all operators are required to accept this risk disclaimer.
