Freedom of expression

The Sniper Circle is a private community primarily focused on trading markets using the HVF Method. This incorporates geopolitical analysis to formulate an accurate view of the world for the purpose of trading. The community attracts liberty-focused individuals who feel disenfranchised by, and have a heavy skepticism towards, mainstream political processes. Social discussion areas are provided where members can express, diverse and potentially provocative views, in a non-censored environment. The community explicitly distances itself from accusations of “isms” (e.g., racism, nationalism) to foster open dialogue. Members who choose to engage in the social areas are encouraged to do so respectfully but must be emotionally resilient and comfortable with potentially emotive or controversial topics, including critiques of historical colonialism, current immigration policies, or speculative discussions about global economic control.

We advise against engaging in these areas and even to reconsider joining the community for those who are highly sensitive, prone to emotional outbursts, or prefer heavily moderated spaces. Social spaces provided are not moderated and The Market Sniper does not censor posts nor take responsibility for members’ expressions. By joining, members agree to tolerate diverse and sometimes challenging viewpoints, engage in respectful discourse, and recognize that the community’s stance does not necessarily reflect the company’s views but prioritizes individual freedom of expression. For those who prefer to steer clear of more controversial discussions, we recommend engaging primarily in the trading-focused areas of the platform, which remain the central pillar of our mission.

Other parties

You accept that, The Market Sniper has an interest in limiting the personal liability of its officers and employees. You agree that you will not bring any claim personally against The Market Sniper’s officers or employees in respect of any losses you suffer in connection with the website.

Without prejudice to the foregoing paragraph, you agree that the limitations of warranties and liability set out in this website disclaimer will protect The Market Sniper's officers, employees, agents, subsidiaries, successors, assigns and sub-contractors as well as The Market Sniper.

For the first time interaction and purchase with The Market Sniper we provide a 100% guarantee for a full 14 days for a full 100% return of all funds if you feel the program is unsuitable. No reasons are required.

Refund conditions: Within 14 days of any Program no more than 50% of HVF Method Revealed course have been completed and no other course material have been consumed. Any subsequent upgrades are always taken at our list price.

When you book a virtual call, your consultant will confirm the list prices of all programs. These are subject to change in a dynamic environment where our deliverables are continually being enhanced and varied according to market conditions.

Disclaimer

Risk Disclosure: Futures and forex trading contains substantial risk and is not for every investor. An investor could potentially lose all or more than the initial investment. Risk

capital is money that can be lost without jeopardizing ones' financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results.

Hypothetical Performance Disclosure: Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. For example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.
