

Terms of Service for LERSER Secure

Last Updated: April 13, 2026

These Terms of Service ("Terms") govern your purchase and use of LERSER Secure (the "Software"), a digital software boilerplate. By purchasing or using the Software, you agree to be bound by these Terms.

1. License Grant

Subject to your payment of the applicable fees, we grant you a non-exclusive, non-transferable, and perpetual license to use the Software code for:

- Personal projects.
- Commercial projects and client work.

Restrictions: You are strictly prohibited from reselling, redistributing, sub-licensing, or sharing the Software as a standalone template, boilerplate, or starter kit, in its original or modified form.

2. "As-Is" Warranty & Security Disclaimer

The Software is provided "AS IS" and "AS AVAILABLE," without warranties of any kind, either express or implied, including but not limited to warranties of merchantability or fitness for a particular purpose.

LERSER Secure is a development tool. You acknowledge that you are solely responsible for:

- The final implementation of the code.
- Managing your environment variables and secrets (e.g., API keys).
- Ensuring the security and compliance of any application built using the Software.

3. Limitation of Liability

To the maximum extent permitted by applicable law, the creators of LERSER Secure shall not be liable for any indirect, incidental, special, or consequential damages, including but not limited to:

- Financial loss or loss of profits.
- Data breaches or security vulnerabilities in your final implementation.
- Unanticipated API costs or usage spikes from third-party providers (e.g., OpenAI, Firebase).

Our total liability for any claim arising out of these Terms shall not exceed the amount paid by you for the Software.

4. No Refund Policy

Due to the digital nature of the Software and the immediate access to the source code upon purchase, all sales are final. We do not offer refunds, exchanges, or cancellations once the download link has been accessed or the digital assets have been delivered via Whop or other platforms.

5. Third-Party Services

The Software integrates with third-party services (e.g., Firebase, OpenAI). Your use of these services is subject to their respective terms and privacy policies. We are not responsible for any changes, outages, or costs associated with these third-party providers.

6. Governing Law

These Terms shall be governed by and construed in accordance with the laws of the jurisdiction where the service provider operates, without regard to its conflict of law provisions.

7. Contact
