

Snipe *under-* *market* deals across auctions and marketplaces ~~before~~ anyone else sees them.

We scan BidRL auctions, OfferUp, and Craigslist across the US every 15 minutes, cross-check each listing against eBay sold comps, and ping our Discord the second something is priced to flip. You bid. They wonder where you found it.

ALERT DELIVERY

— 01 — THE PROOF

This is what lands in
your phone *before the
auction ends.*

No hype, no maybes. Each alert ships current bid, our calculated max-profit ceiling, the resale comp, time remaining, and a one-tap link to BidRL. If you can read a price tag, you can flip this.

Real Discord embed format. Colors mean what you think they mean: green = reliable bid window, amber = ending now.

— 02 — WHAT YOU GET

Free is fine. *VIP is the edge.*

The free channel exists so you can verify the alerts are real. But by the time a free alert fires, the auction is

usually closed. VIP is real-time – that's the whole product.

FREE

WITHOUT

No FlipDeals

\$0 + your weekend

- × Refresh BidRL for hours
- × Open eBay in 14 tabs
- × Math the fees in your head
- × Miss the closing window
- × Watch someone else snipe it
- × Repeat tomorrow

Status quo

Three steps. *No software to install.*

You join the Discord. The scanner does the rest. There is no app, no extension, no chrome plugin. If your phone gets Discord notifications, you're set up.

01

Scanner runs every 15 min

We poll BidRL auctions nationwide, plus OfferUp and Craigslist across major US metros. Every listing gets classified, then scored against live eBay sold-comps.

- RUNS 6AM-12AM PT

02

Under-market hits go to Discord

Anything priced >30% below resale comps gets posted to #vip-feed with bid, max-profit ceiling, and a tap-through link.

- <60S SCAN-TO-POST

03

You bid before they do

Phone buzzes. You glance, decide, tap. We surface auctions ending in <2h so you're not waiting around – and not getting sniped at the buzzer.

04 - CATEGORIES COVERED

Everything *worth flipping*. Nothing else.

We don't waste alerts on used socks. Tier 1 categories get the full deep scan with image ID and resale comping. Junk gets dropped at the door.

🎧 Audio

🏠 Smart Home

02 - SOURCES SCANNED

☰ BidRL auctions · nationwide

☑ OfferUp · local pickup

☰ Craigslist · NorCal regions

+ + more soon

Tier 2 categories (kitchenware, decor, lighting) get eBay-only checks. Tier 3 junk (cosmetics, food, used clothing) is filtered out automatically.

Two tiers. *One obvious choice.*

If one VIP alert lands you a \$50 flip, the month paid for itself. We pay for ourselves on the first hit.

VIP

For people who actually flip

\$25 /month

Cancel anytime via Whop. No contracts.

- ✓ Real-time alerts in #vip-feed
- ✓ Every Tier 1 category, BidRL nationwide + OfferUp + Craigslist
- ✓ Max-bid calculator on every alert
- ✓ Ending-soon priority (lots <2h)
- ✓ Discord mobile push notifications
- ✓ Direct DM access to Sam

[Join VIP – \\$25/mo →](#)

The signal-to-noise on the VIP feed is the whole product. Other deal-finder tools dump 200 items/day on you – most are junk. This drops 5-15, all worth a look.

– WHAT WE'RE BUILDING TOWARD

One under-market hit that turns into a \$200 flip pays for the whole year. We only need to be right a few times a month.

The honest *FAQ*.

Is this legal? +

How fast are the VIP alerts, really? +

Which areas / sources do you cover? +

Can I cancel? +

Do you guarantee profit? +

How is this different from just browsing Bid RL myself? +

The next under-market lot drops in *~14* *minutes.*

You can keep refreshing BidRL or you can let
the bot do it. Either way it's fine. One of
those is just faster.
